NARENDRAN C

Lead Solutions Architect & IT Operations

Chennai, India | +91 8015111019 | hello@naren.info | www.naren.info

PROFESSIONAL SUMMARY

Results-driven Lead Solutions Architect with a proven track record of designing, deploying, and scaling digital infrastructure across multiple international brands. Specializing in Next.js, full-stack development, and advanced business process automation (BPA), with expertise in transforming complex business requirements into high-performance technical ecosystems. Highly skilled in managing self-hosted server environments and architecting sophisticated n8n workflows to eliminate manual bottlenecks and drive operational efficiency. Seeking a senior architectural or technical leadership role abroad to leverage expertise in scalable web technologies and IT operations.

CORE COMPETENCIES

System Automation & Integration
Advanced n8n workflow architecture, API development & consumption (REST/GraphQL), third-party system sync, automated lead routing

Infrastructure & DevOps
KVM VPS Management, Server Deployment via Coolify, reverse proxy configuration, system monitoring

Project Leadership
Cross-border IT operations, B2B/B2C platform architecture, compliance-driven development, technical team mentoring

Technical Stack
Next.js, React.js, TailwindCSS, HTML, CSS, Node.js, JavaScript

CMS & Design
WordPress, Webflow, Figma, Adobe XD, Adobe Illustrator

WORK EXPERIENCE

Lead Solutions Architect | Infygru Private Limited *April 2021 – Present*

Directs technical strategy, system architecture, and IT operations for a diverse portfolio of international and domestic digital brands.

- Workflow Automation (n8n): Architected and deployed high-performance n8n automation pipelines handling 3,915 automated production executions with a flawless 0% failure rate and 0.02s average execution time, effectively eliminating manual data entry across CRM and lead generation tools.
- Infrastructure & DevOps: Independently provisioned and managed multiple self-hosted KVM VPS environments (Ubuntu 22.04/24.04). Utilized Coolify for seamless deployment, optimizing server architecture to maintain sub-30% CPU load and under 50% memory usage across all production applications.
- Travel Tech Solutions (MyPerfectTrips & IG Holidays): Engineered the complete digital infrastructure for UK and Indian travel brands. Developed a scalable Next.js front-end that achieved a 99 Performance and 100 SEO score on Google PageSpeed Insights, with ultra-fast load times (0.4s FCP).
- B2B Infrastructure (Infysmart): Drove the technical development for a regional CCTV and solar solutions provider. Built a highly optimized platform scoring 100 for both SEO and Best Practices, driving organic lead generation for commercial tender bidding.
- Compliance & B2B Platforms (Aster Homecare UK & Smarthire Recruitment): Led the technical setup for UK-based healthcare and recruitment operations, ensuring secure, compliant web platforms that align with strict regional regulatory standards.

Freelance Web Developer | Self-Employed *2019 – 2021*

- Delivered end-to-end responsive websites and applications for diverse clients using React, WordPress, HTML, CSS, and JavaScript.
